Independent Vision

# Preparing for your demonstration

## **Electronic Magnifiers - Video Magnifiers - CCTVs**

Different names for the same type of product. They are designed to Magnify and Enhance any reading material, picture or object that you are having difficulty in seeing. It is important that you know what type of material you want to see. Reading books or magazines on a regular basis may require a more sophisticated machine than reading the occasional letter. Being able to complete the crossword or sudoku may be important to you. Perhaps you would like to continue your knitting or cross stitch. Do you need a machine that is transportable? Knowing why you are asking for a demonstration will help identify the product that best suits your needs. If magnification is not suitable then a machine that reads your letters and magazines to you, may be the solution.

- 1. Know what your expectations are**
- 2. Have material available to try**
- 3. Do you want a friend or family member to be present?**

**We are an independent company we sometimes change our products as technology changes.  
This brochure is intended to give an overview of what you should expect from our products.  
We cannot guarantee specific products will be available for hire at the time of your demonstration.**

# Portable

**£20  
Per Month**

Portable video magnifiers are powered and charged in a similar way to a mobile phone, tablet or kindle, they contain rechargeable batteries; this allows you the freedom to take the video magnifier with you in the same way as a standard lens magnifier.

The portability depends on the user and the size of the screen. A smaller 4.3 inch screen may allow the magnifier to fit into a pocket or bag but a 7" screen will give more text on the screen at a similar magnification. The larger screen may be more appropriate if you are attending meetings or need to read larger bodies of text.

Both types of magnifier have variable levels of magnification to help you see even the smallest text. They also have enhanced colour options and natural colour mode. Battery life will vary but should give over three hours use if fully charged.

**Amigo 7" HD**

**Snow 7" HD**

**iLoView 7" HD**

# Television Linked

**£15**  
**Per Month**

These magnifiers do not magnify your television image. Connect the TV eye to your television via the SCART connection. Place your text under the TV eye. You will be able to view your text in full colour, enhanced positive or enhanced negative. The Magnification level is variable and will depend on the size of your TV screen. They are simple to set up and operate.

**TV eye**

# Transportable

**£40**  
**Per Month**

See near, far and everything in between with this portable battery operated electronic magnifier, operated by integral battery or mains. High definition gives a beautiful crystal clear picture and vibrant display. Its small footprint and lightweight design provide true portability from the classroom to home and work. Easy to set up and ready to use.

- ▶ 13.3" Screen
- ▶ Magnification up to x65

**Acrobat Mini**

# Desktop

**£35**  
**Per Month**

The clear choice in desktop magnifiers for reading and writing. Confidential documents or private letters, books, or newspapers. Not just a reading machine, the Merlin will cater for all your magnification needs including viewing photographs and doing crosswords or puzzles.

- ▶ Magnification up to x60

Our desktop magnifiers have:

- ▶ 22" or 24" screens
- ▶ Full Colour
- ▶ Enhanced colour modes
- ▶ Adjustable brightness
- ▶ XY reading platform

A complete and user friendly desktop solution the i-See has excellent functionality, adjustable settings to suit the individual and an ergonomic design. Adjustable contrast and brightness combine with a clear full colour photo image.

- ▶ Magnification up to x70

**Merlin**

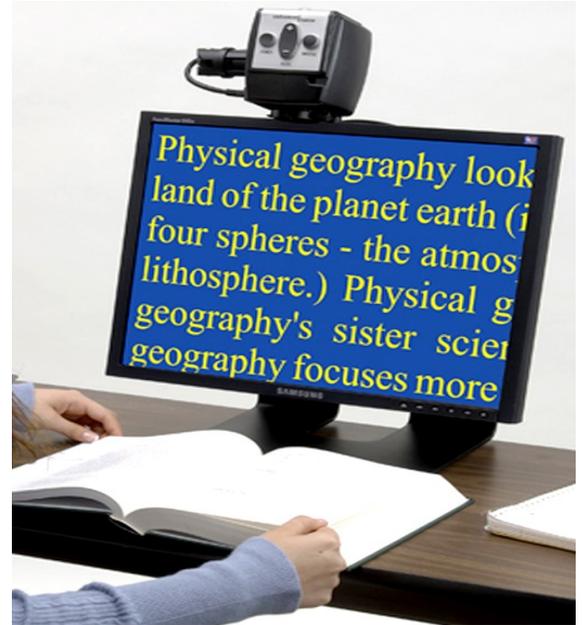

**i-See**

# Versatile

**£40**  
**Per Month**

See near, far and everything in between with the Acrobat. The most flexible solution for reading, writing or viewing at any distance. By simply rotating the camera you can magnify images in the distance. Use it to view presentations, paperwork or work on crafts and hobbies. The three in one magnifier comes complete with its own monitor. (20" 22")

- Magnification up to x75

**Acrobat**

DaVinci is a high definition desktop video magnifier that also features text to speech (OCR). With the push of a button printed text that is displayed on the screen will be read aloud. The camera can rotate for distance viewing and for self viewing. DaVinci's Sony HD camera displays images in vibrant colour and contrast.

- Magnification up to x80

**£50**  
**Per Month**

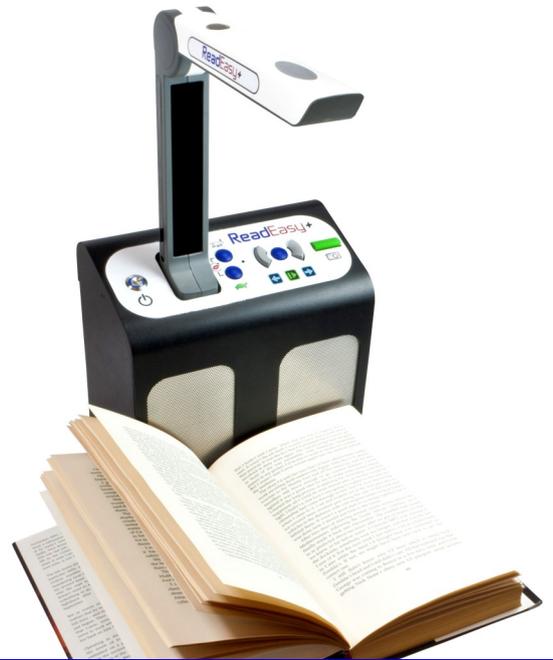

**DaVinci**

# Reading Machines

**£35**  
**Per Month**

A machine that reads print to you! At the touch of a button the ReadEasy translates, within seconds, printed text into clear speech. Letters, bank statements, books or curved objects such as tins. The easy to use controls allow you to stop, start, go forward or backwards through your document.

**ReadEasy**

Easy-to-use, Smart Reader boasts a lightweight portable sleek design with a user friendly console. The easy to use controls allow you to stop, start, go forward or backwards through your document. Position your document and press a button, in seconds Smart Reader begins reading aloud. Connect Smart Reader to a TV or monitor and enlarge your captured image to follow along as it reads.
